

New Traffic Arrangements for Sligo City Summer 2006

New traffic arrangements are being introduced to Sligo city which will greatly enhance the 'shopping experience' by eliminating traffic from the city centre area. Other changes to traffic flows are being introduced to regulate the movement of traffic around the city.

O'Connell Street and Tobergal Lane will become pedestrian only with access for deliveries (from the northern post office end) proposed from 08:00am to 11:30am. No vehicular access will be permitted outside these hours.

Other improvements to traffic flow in the City Centre are:

- Old Market Street one way South
- No exit from JFK Parade onto Bridge St. / Thomas St.
- Improved junction capacity at "Veritas Corner" of John Street and Adelaide Street. Alterations include introducing a left turn slip lane and green left turn arrow for traffic approaching junction from the South.
- No left turn from Upper John Street to Adelaide Street and no right turn for south bound traffic into Upper John Street.

The city centre will be surrounded by traffic calmed streets which will form a 'home zone' and will be available for access, deliveries and the carrying out of business without the need to accommodate through traffic. The addition of landscaping, environmental improvement works and street furniture will make the city centre a safer and more pleasant environment for pedestrians.
